ADRIÁN EDUARDO URTIZ PARRA

Passionate about software development, I consider myself a highly motivated individual with a strong desire to learn and improve continuously. I have experience leading multidisciplinary development teams and working on web and software projects across different sectors. My main focus is on creating efficient and scalable solutions, always seeking new technologies and methodologies that enhance my skills and improve team results.

Experience

Harman, Querétaro — *Software Development Intern*

January 2025 – July 2025

- Developed an inventory module for a digital manufacturing platform.
- Implemented inventory entries, outputs, and adjustments structured in a tree hierarchy.
- Participated in weekly meetings with functional deliveries and direct feedback from the team.

Freelance, Morelia — *Full Stack Developer*

August 2022 – Present

- **SIPREM**: System for managing economic support requests for shelters. Developed the architecture, backend, frontend, and deployed with Next.js, PostgreSQL, and Ubuntu.
- **DEPI**: Academic program website. Improved the UI with Next.js, integrated an API built with Express, and used Strapi as a CMS.
- **Sandar Inmuebles**: Real estate listing platform. Built using React, with Firebase and Firestore for storage.
- **Sisogem**: Government meeting management system. Real-time functionality and PDF generation using React, AWS Amplify, SES, S3, and an Express-based API.

FORMACIÓN

Instituto Tecnológico de Morelia — *Computer Systems Engineering*

August 2019 – Present

- Active participant in the Academic Software Factory.
- Focused on web development and database management.
- Expected graduation: December 2025.
