

ADRIÁN EDUARDO URTIZ PARRA

Software developer with experience in **frontend and backend development**, focused on building **scalable and efficient web solutions**. Passionate about continuous learning and adopting **emerging technologies** to improve processes. Experienced working independently and in multidisciplinary teams, delivering projects in the **education, real estate, government, and manufacturing** sectors.

EXPERIENCE

Harman, Querétaro – Software Development Intern

January 2025 – July 2025

- Developed an **inventory management module** for the manufacturing platform.
- Implemented tree-based hierarchical structures for inventory entries, outputs, and adjustments.
- Collaborated in **weekly iterations**, delivering functional features and receiving direct feedback from the team.

Freelance, Morelia – Full Stack Developer

August 2022 – Present

- **SIPREM**: System to manage financial aid requests for shelters. Designed full architecture, backend, and frontend using **Next.js, PostgreSQL, and Ubuntu**.
- **DEPI**: Academic program website. Improved the UI with Next.js, integrated an API built with Express, and used Strapi as a CMS.
- **Sandar Inmuebles**: Real estate listing platform. Built using React, with Firebase and Firestore for storage.
- **Sisogem**: Government meeting management system. Real-time functionality and PDF generation using React, AWS Amplify, SES, S3, and an Express-based API.

EDUCATION

Instituto Tecnológico de Morelia – B.S. in Computer Systems Engineering

August 2019 – July 2025

- Specialization in **Software Engineering**.
- Member of the **Academic Software Factory**, with focus on web development and database management.
- **Graduated** in July 2025.

TECHNICAL SKILLS

- **Languages & Frameworks**: JavaScript, TypeScript, Python, SQL, HTML, CSS, React, Next.js, Express, Django, PHP, Symfony, Java, Spring Boot.
- **Databases**: PostgreSQL, MySQL, Firebase, Firestore.
- **DevOps & Cloud**: AWS (Amplify, SES, S3), Ubuntu/Linux, Docker.
- **Others**: Git, Agile methodologies (Scrum), API integration.
